

BENJAMIN JOOSSENS

Bachelor of applied computer science (2024)

A driven team player with hands-on programming and project experience, always looking for a professional and a private challenge. I am keen to apply and develop my skills in a company setting to work on real-world problems.

JavaScript

Git

Web design

EDUCATION

UCLL | Leuven

Applied Informatics (Software Development)
2020-2024

Heilig-graf | Turnhout

IT & Networking
2018-2020

EXPERIENCE

Software Engineer

Intertel - Telecom
April 2025 - Present

Driving major technical milestones by engineering a custom, high-volume VoIP billing system capable of rating complex telecom usage data. Alongside architecting this core infrastructure, I manage the company's e-commerce operations, developing custom plugins and payment integrations to maintain a seamless digital customer experience.

Internship

Recyclear (Leuven based project to develop alternative recycling technologies)
February 2024 - May 2024

Contributed to developing software for automated sorting of secondary material streams. I applied my embedded computing and python skills to facilitate real time processing of visual information on single-board computers (Raspberry Pi, Odroid). Furthermore, I was involved in GUI development using python and the DASH framework.

Volunteer

Youth club Wollewei
2017 - 2020

Organised social events and doing shifts
